Full Stack Web Specialist · ASP.NET Core · React · Azure DevOps · Multi-Tenant SaaS · Mobile

Shah Alam, Selangor, Malaysia · +60 13-961 0053 · ameeradhwa92@gmail.com ·
linkedin.com/in/ameeradhwa92 · github.com/ameeradhwa92

Full stack web specialist with 12+ years building web and mobile systems for enterprise and government clients in Malaysia. Main developer behind **RetailAIM® Plus**, a multi-tenant ASP.NET Core SaaS platform used by 20+ FMCG brands (Nestlé, Unilever, Abbott, Farm Fresh) and field-marketing operators including **DemoPower** across Malaysia, Singapore, Thailand and the Philippines — with more markets on the way. Current work includes rebuilding the platform's back office in React and FastAPI, migrating the Abbott CRM to a React + .NET 10 clean-architecture stack, and running the Azure DevOps CI/CD pipelines that ship all of it to production. Before that, spent years delivering licensing, certification and payment systems for government agencies (CIDB, SPAN, SIRIM, Port Klang Authority, Kastam) on the web and on native Android/iOS — the kind of systems that replace paper forms and Excel files with something people actually use daily.

CORE TECHNICAL SKILLS

Web & Backend

ASP.NET Core (MVC), ASP.NET Framework, C#, Entity Framework (ORM), Python (FastAPI), REST & SOAP APIs, Laravel/PHP

Mobile

Flutter/Dart, Android (Kotlin, Java), iOS (Swift), Ionic Framework

Cloud & DevOps

Azure DevOps (Repos, Pipelines, YAML CI/CD), Azure App Service, ARM/Bicep IaC, Git/GitHub/Bitbucket

Frontend & UI/UX

React, TypeScript, Vite, TailwindCSS, ShadCN/Radix, React Query, DevExpress, Bootstrap, JavaScript, HTML5/CSS3

Data & Databases

MS SQL Server, Azure SQL, MySQL, SQLite, stored-procedure → Entity Framework migration

Integrations

Salesforce CRM API, SAP, AutoCount ERP, iPay88, SenangPay, eGHL, PayPal, WhatsApp Business API, FCM/Pushwoosh

PROFESSIONAL EXPERIENCE

RetailAIM Malaysia Sdn. Bhd.

Kuala Lumpur
Aug 2023 – Present

Formerly the ISIT division of Always Marketing (M) Sdn. Bhd. — restructured into RetailAIM Malaysia Sdn. Bhd. in Jan 2025 (same organisation, continuous tenure)

Full Stack Web Specialist — Jan 2025 – Present

- Sole developer of **RetailAIM® Plus**, a multi-tenant ASP.NET Core MVC SaaS platform replacing the legacy BackOffice/QuickView systems, serving 20+ FMCG clients (Nestlé, Unilever, Farm Fresh, Abbott) and powering **DemoPower's** in-store sampling & demonstration operations, across Malaysia, Singapore, Thailand & the Philippines with further markets rolling out.
- Building the next-generation **RetailAIM Plus BackOffice** — a React 18 + TypeScript (Vite, TailwindCSS, ShadCN) front end over a Python FastAPI API, with per-tenant database resolution, JWT HttpOnly-cookie auth and ASP.NET Identity password back-compat.
- Migrating the **Abbott CRM** to a React PWA backed by a .NET 10 clean-architecture API in a monorepo, with Bicep infrastructure-as-code and shared .NET integration libraries.
- Migrated core business logic from MSSQL stored procedures into Entity Framework ORM models across 5 enterprise modules (Retail Execution, Merchandising BI, Field Sales Ordering, Stock Take Automation, Consumer Insights).
- Built Abbott's **Salesforce CRM integration** (API v60.0): a 14-step conditional workflow spanning dual cloud environments (Azure + RetailAIM), covering account/contact creation, duplicate detection, OTP verification via the Bird WhatsApp API, and digital consent capture.
- Engineered the **Promoter Payment System**, a 5-level digital approval and payroll platform replacing a manual Excel process — automating attendance sync, Maybank bulk-payment exports, and mobile payslip distribution.
- Own the full CI/CD lifecycle in Azure DevOps: branch policies, PR gates, YAML pipelines, and automated releases to Azure App Service across staging and production slots.

Web Application Developer — Aug 2023 – Dec 2024, as Always Marketing (M) Sdn. Bhd.

- Built and scaled **RetailAIM®**, a multi-tenant workflow platform for promoter and merchandising operations, supporting 10+ FMCG clients across Malaysia, Singapore & Thailand.
- Implemented end-to-end Azure DevOps CI/CD pipelines with enforced pull-request approvals and automated staging/production deployments.
- Developed and integrated REST/SOAP web services connecting the mobile app with AutoCount Accounting software.
- Planned and drove the technical migration path from ASP.NET Framework to .NET Core, Entity Framework & DevExpress.

NCS Global Technology

Sdn. Bhd.

Remote (Contract)

Feb 2023 – Aug 2023

Android / iOS Developer

- Delivered features for Motorola Solutions' **Public Safety Platform** Android application under strict defense-in-depth and high-test-coverage standards.
- Contributed to code review, incident response, and continuous improvement within an agile delivery team.

TRM Nett Systems (M)

Sdn. Bhd.

Petaling Jaya

Mar 2015 – Jan 2023

(7 yrs 10 mos)

Web & Mobile Application Developer — *progressed Junior to Senior*

- Delivered 15+ production systems for Malaysian government agencies and regulated industries (CIDB, SPAN, SIRIM, Port Klang Authority, Kastam, LPPEH) spanning web, native Android/iOS, and cross-platform mobile.
- Built **Service 73**, a real-time GPS team-management app with geofencing, task assignment, and push notifications, published to Google Play and the App Store.
- Delivered multi-step approval and licensing platforms (LPPEH BIS, CIDB CCPM, SPAN eCLAPS) integrating payment gateways and third-party verification services (SSM, CIDB, DAPAT, SAGA, PMS).
- Pioneered **Flutter** adoption for cross-platform mobile (PKFZ Senai Airport City), eliminating separate Android/iOS codebases, and introduced Git-based version control company-wide, replacing manual ZIP-archive backups.

MyEMRO Sdn. Bhd.

Kuala Lumpur

Sep 2013 – Aug 2014

Web Application Developer

- Developed an aircraft maintenance scheduling system (Ruby on Rails) handling thousands of datasets across aircraft compartments for MRO operations.

NOTABLE PROJECTS

RetailAIM® Platform — current

RetailAIM® Plus — multi-tenant ASP.NET Core MVC SaaS replacing the legacy BackOffice & QuickView; Retail Execution, Merchandising BI, Field Sales Ordering, Stock Take and Consumer Insights modules for 20+ FMCG tenants, including **DemoPower**, Thailand's leading in-store sampling operator; live in MY, SG, TH & PH.

Abbott CRM Platform — React PWA + .NET 10 clean-architecture monorepo migration of the Abbott promoter/admin CRM, with Bicep IaC and shared .NET integration libraries.

RetailAIM® BackOffice & QuickView — administrative portal (clients, projects, products, promoter scheduling) and field-operations console for transaction oversight and flow approvals.

Government & Enterprise

Motorola Solutions Public Safety Platform — feature development on the mission-critical Android app under defense-in-depth security and high test-coverage standards (via NCS Global Technology).

SIRIM CYL (Check Your Label) — product-certification verification app for SIRIM QAS International (IMEI/serial lookup, ePermit, TAC, SLP); later rebuilt as a Flutter clean-architecture monorepo.

SPAN eCLAPS — centralised licence & permit system (Laravel) with SenangPay payments, SSM/DAPAT/SAGA/CIDB integrations and PDF virtual certificates.

MARii EEV Label — energy-efficient vehicle star-rating application for OEMs, with eGHL payments and QR-verified PDF technical reports.

ClinicPlus — full clinic management: patient/doctor/drug admin, multi-queue tracking, panel/cash drug pricing, invoicing and patient-dependent linking.

PKFZ PIMS & Senai Airport City FZ — free-zone gate & cargo apps with real-time declaration and vessel status; SACFZ was the company's first Flutter production build.

RetailAIM Plus BackOffice (React + FastAPI) — next-gen back office: React 18/TypeScript/TailwindCSS front end, Python FastAPI + Azure SQL backend with per-tenant DB resolution and JWT cookie auth.

Promoter Payment System (PPS) — 5-level digital approval & payroll platform: attendance sync, Maybank bulk-payment exports and mobile payslips, replacing a manual Excel workflow.

Salesforce CRM Integration (Abbott) — 14-step conditional workflow across Azure and RetailAIM: account/contact creation, duplicate detection, WhatsApp OTP and digital consent capture.

Service 73 — real-time GPS team management with geofencing, task assignment, mileage tracking and push notifications; Android, iOS & web.

CIDB CCPM — construction product & material certification: multi-step verification/approval, blacklisting tracking, PMS payments, plus an on-site officer Android app.

Kastam eCAF — electronic customs administration forms for PKFZ, North Port & Westport with QR-coded T1 forms, DNT onboarding and gatepass integration.

LPPEH BIS & mobile app — Board Information System for valuers, appraisers & estate agents (licensing approvals, reporting) plus a public verification app on Android & iOS.

PKA eDCFZ — dangerous cargo & free zone declaration app with real-time Ship Call Numbers, IMDG info and push status updates.

CIDB Contractor4U — marketplace app connecting homeowners with CIDB-registered (G1/G2) contractors for quotations, enquiries and job status tracking.
